

John Rolly N. Cedillo

Front-End Junior Software Engineer

Muntinlupa Metro Manila, Philippines | [linkedin.com/in/john00rolly/](https://www.linkedin.com/in/john00rolly/) | github.com/Hot00Sauce | +63 938 561 6893 | <mailto:johnrollycedillo@gmail.com> | Portfolio: john-rolly-cedillo-portfolio.vercel.app

Summary

Front-End Software Engineer specializing in React.js and TypeScript, with full-stack range across Node.js, PHP, and SQL databases. Experienced building real-time and PWA features with a focus on performance and user experience. Comfortable deploying applications using tools like Supabase and Vercel, with a growing interest in Python and writing clean, maintainable code.

Experience

[MetroSeek](#) | Lead Full-Stack Developer (Project)

January 2025 – March 2026

Tech: React.js, TypeScript, Supabase, Vite

- Led a team of 3, delivering 100% of milestones on time using Agile
- Built a GPS-based alert system notifying users within a 50km radius
- Developed a React.js PWA, improving load speed by ~30% via caching and lazy loading

[VetConnect](#) | Lead Full Stack Developer (Project)

October 2024 – December 2025

Tech: JavaScript, HTML, CSS, PHP, MySQL

- Built a PHP/MySQL platform supporting appointment scheduling for veterinary clinics
- Implemented secure data handling and appointment scheduling
- Developed a mobile-first UI with a dual-panel notification system

[TravelSpotPH](#) | Lead Full-Stack Developer (Project)

February 2023 – March 2024

Tech: JavaScript, PHP, MySQL, MongoDB

- Built a travel platform using PHP, MySQL, and MongoDB
- Deployed on Vercel, optimizing performance with compression and caching
- Developed a responsive UI with secure authentication and session management

[OSMUN Health-Tech](#) | Full-Stack (Freelance)

April 2024 – August 2025

Tech: JavaScript, PHP CodeIgniter, MySQL

- Built a PHP CodeIgniter and MySQL backend for reliable data processing
- Improved patient and admin interfaces with real-time validation and notifications

[Spindiv Kinetics](#) | Web Developer

Oct 2025 – Present

Tech: HTML, CSS, JavaScript, PHP, WordPress, Elementor

- Developed high-traffic websites using PHP, HTML, CSS, and JavaScript
- Managed Hostinger server infrastructure and 10+ domains, configuring server environments, maintaining directory structures, and ensuring 99.9% uptime
- Managed multi-site eCommerce platforms with optimized performance
- Implemented security measures, including Wordfence and SSH access
- Built custom UI components with Elementor and code
- Integrated and customized WordPress plugins to improve site performance and security

Technical Skills

Languages: JavaScript (ES6+), TypeScript, PHP, Python, SQL

Frontend: React.js, Angular, HTML5, CSS3, Tailwind CSS

Backend: Node.js, CodeIgniter, REST APIs

Databases: MySQL, PostgreSQL, MongoDB

CMS & Web Platforms: WordPress, Elementor, WooCommerce, WPCode

SEO & Marketing: On-Page SEO, Technical SEO, Google Search Console, CRM Integration, Email Marketing Automation (SMTP)

DevOps & Hosting: Docker, AWS, Hostinger Server Management, Vercel, Git/GitHub

Tools & Automation: n8n, GoHighLevel, Figma

Education

Bachelor of Science in Information Technology

2022 - 2026

University of the City of Muntinlupa

Relevant Coursework: Data Structures and Algorithms, Web Development, Database Management Systems, Object-Oriented Programming, System Management
